Buddhist Tzu Chi Medical Foundation
SERVING WITH COMPASSION

Among the eight sufferings of life, illness is the most painful. With the aim of patient-centered medical care that respects patients as teachers, Tzu Chi's medical staff will shoulder the responsibility of caring for people's lives and must ensure proper care of the body, mind, and soul of the patients.

Dharma Master Cheng Yen
Founder of Tzu Chi Foundation

About Tzu Chi

Tzu Chi, founded in 1966 in Taiwan, is an international humanitarian organization. It strives to relieve the suffering of those in need and create a better world for all, through working in the fields of charity, medicine, education, humanistic culture, international relief, bone marrow donor registry, environment protection, and volunteers.

About Tzu Chi Medical Foundation

With the goal of providing patient-centered medical care, Tzu Chi Medical Foundation was first established in 1993 as a charitable non-profit 501(c)(3) volunteer-based free clinic. We are dedicated to the provision of quality community health services in the forms of clinics, outreaches, and healthy community programs for underserved populations, at minimal to no cost primarily in California. In 24 years, Tzu Chi Medical has expanded from a free clinic to three community clinics and seven mobile clinics. Since 2011, preventive education and healthy living program have been implemented at Tzu Chi clinics. We have actively participated in large-scale and local medical outreach events for 24 years and have held international medical missions across the U.S. and nearby developing countries since the 1990s.

Mission

To provide patient-centered medical care with compassion to underprivileged individuals regardless of religion, age, gender, ethnicity or ability to pay.

Vision

To provide medical aid while inspiring love and humanity to both the givers and receivers.

A message from the CEO

Dear Friends,

I would like to express my heartfelt appreciation to the support of all donors, sponsors, partners, medical professionals and logistic volunteers for the past 24 years. Throughout these years, we have tirelessly served unprivileged populations including uninsured and underinsured low-income families, school children, homeless, migrant farm workers, and other people with very limited access to healthcare.

In order to assist more needy communities, we have grown from a free clinic to three community clinics in the Los Angeles area. We have also expanded primary medical care across California through seven mobile clinics. In addition, we have engaged patients in a healthy lifestyle through the Healthy Community Program with activities such as health education, chronic disease management, cancer screening, kidney dialysis support group, and cancer support group. We are proud to reach over 58,738 patient in our community clinics, mobile clinics, and medical outreaches in 2017.

Toward the 25th anniversary of the **Tzu Chi Medical Foundation**, we are determined to strengthen our long-term sustainability by applying for Federally Qualified Health Center (FQHC) in 2019, developing Integrative East-West medicine, enhancing medical outreach capacity of Tzu Chi International Medical Association (TIMA), and expanding international missions in the Latin America and the Caribbean.

We will continually strive to achieve our goal of providing better healthcare to more underserved communities. I appreciate the support you have given us and thank you for trusting us with your healthcare.

Sincerely,

A handwritten signature in black ink, reading "William K. H., M.D.". The signature is fluid and cursive, with the letters "W", "K", and "H" being particularly large and stylized. The "M.D." is written in a smaller, more formal font at the end of the signature.

Permanent Clinics

Tzu Chi Medical Center, Alhambra
Established in 1993

The U.S. spends roughly twice as much on health care as other high-income countries. Many Americans experience difficulty paying for needed health care services. Even if low-income individuals have serious illnesses and are on Medi-Cal, they may have been denied coverage for expensive medication. Therefore, Tzu Chi permanent clinics have been dedicated to providing comprehensive health care to patients who cannot afford the high medical cost.

In 1993, the first Tzu Chi Free Clinic in Alhambra, California, was established, providing primary medical, dental, and acupuncture services. In 24 years, we have expanded to three permanent clinics in the Greater Los Angeles area, primarily serving low-income families and people with language or other barriers.

Tzu Chi Community Clinic,
South El Monte
Established in 2005

Tzu Chi Community Clinic, Wilmington

Dr. Shirley Chen and volunteer Dental assistant Sylvia Wihardjo treat a patient in Tzu Chi's South El Monte clinic.

Dr. Stephen Denq gives Yolanda a medical exam.

It was a nightmare when Yolanda, a low-income immigrant from Mexico realized that she had Hepatitis C. It is a viral infection that causes liver inflammation, sometimes leading to serious liver damage. Yolanda's liver started to get worse, and she felt hopeless to be recovered because of the highly expensive treatment that costs about \$30,000 a month for 3 months or more.

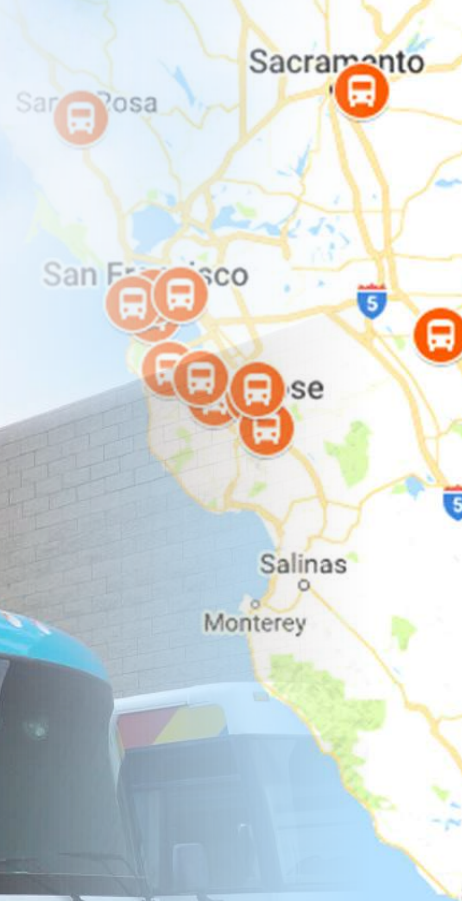

With caring hearts, Tzu Chi doctors and medical professionals not only provided medical services with love and respect but also looked for different ways to let her receive a more affordable treatment. Her dream of recovery was actualized because of Tzu Chi's efforts of providing the medicine with significantly lowered cost. She took the medicine for three months, and the doctors finally told her that she was fully recovered.

"Incredible! I am grateful to Tzu Chi. Tzu Chi saved me. Without Tzu Chi, I would not have enough money to buy the medicine to treat my illness. All of your help is so amazing."

– Yolanda

Mobile Clinics

Seven great love mobile clinics which serves more than ten thousand patients.

*In 2017, our mobile clinics served 13,656 people.
Medical care for 2,845, Dental care for 3,209, Acupuncture and
Chiropractic care for 1,070, vision care for 6,532.*

3,209
Dental

In order to reach out to socioeconomically disadvantaged communities with people who have financial, language, and transportation barriers, Tzu Chi Mobile Clinics launched its first mobile clinic in 2000. To further expand our service areas, more mobile clinics were built to serve in Fresno and Milpitas, California, in 2003 and 2008 respectively.

After providing medical and dental services for more than 10 years, Tzu Chi realized the need for vision and cancer prevention services. Therefore, vision and Zero Cancer mobile clinics started to operate in the 2010s in Fresno and Los Angeles. Today, Tzu Chi continues to serve needy communities at no cost with 3 dental, 2 vision, 1 medical, and 1 Zero Cancer mobile clinics across Northern, Central, and Southern California.

Tzu Chi mobile services are provided in different scales, from local community events to large-scale, multi-day outreaches including Care Harbor, Care 4 A Healthy I.E., and Healthy Fresno.

1,070

Chiropractic care

6,532
Vision

We may never imagine that there are people in our communities that use unsterilized knives to perform unsafe extractions by themselves and can only eat baby food for a decade. Unfortunately, these tragedies are common among the homeless population. Tzu Chi has been providing free dental services to homeless people who cannot afford the high dental cost and have transportation problems. Our mobile clinic has relieved their pain in the Winter Homeless Shelters for about 10 years.

“If there was no dental [mobile clinic], I’d still be crying in pain.” – A Female Homeless Patient

“We need help, but we’ll survive. Some people are helping us. I’m really looking forward to getting some teeth again.” – A Male Homeless Patient

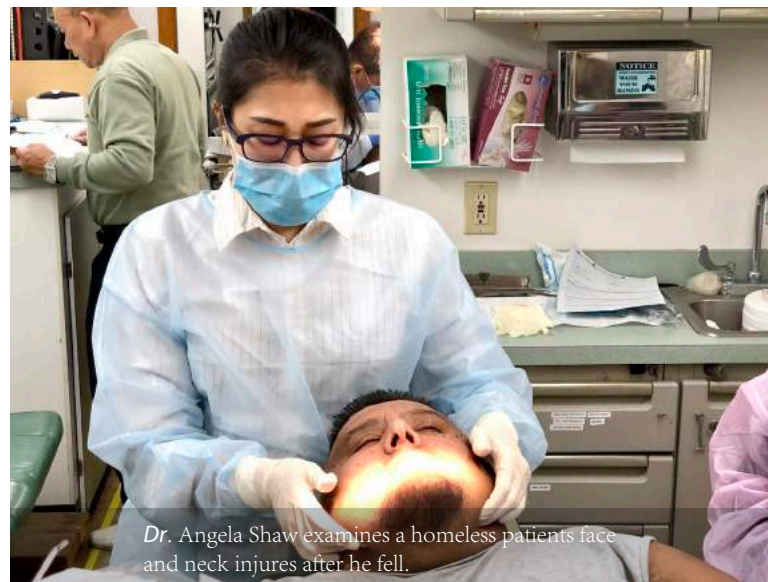

“The fact that you have your mobile van that comes to where they are is really critical.” – Robert McKennon, Director of the East San Gabriel Coalition for the Homeless

Monique smiled after getting her first set of glasses.

Dr. George Wan patiently listens to a woman showing him the source of her tooth pain.

Dr. Angela Shaw examines a homeless patients face and neck injuries after he fell.

In Yettem, California, Mr. Lupercio, a low-income migrant farm worker, has been striving to give his family a better life. However, he could not afford the necessary eyeglasses for his family for 30 years long and could only see the suffering of his family caused by vision problems. Because of vision issues, Mrs. Lupercio has debilitating headaches frequently, and his daughters were suffering in their daily lives and in school. After realizing the Lupercio family's situation, the Tzu Chi vision mobile diagnosed their ailments and made eyeglasses available to the whole family. Thirty years of suffering was finally relieved in an afternoon with Tzu Chi's help.

"I give thanks to God for this opportunity – my whole family has glasses. We'll be able to see everything very well. Thanks to God and to you all for helping us!" – Mr. Lupercio

Domestic Medical Outreach

In 2017, our local medical outreach served 15,643 patients in 326 medical outreach events, with the help and support of 1,902 medical professionals.

15,643
Patients served

1,902
Medical professionals

Tzu Chi International Medical Association (TIMA) is an organized global volunteer network of over 8,600 licensed medical professionals who serve as volunteers to treat needy individuals and disaster victims. The USA branch of TIMA has grown strong with about 3,000 medical professionals and logistic volunteers.

Tzu Chi started to hold medical outreaches in the U.S. in response to natural disasters and community needs since 1994. We have partnered with influential organizations including Remote Area Medical (RAM), Care Harbor, and Molina Healthcare/Molina Medical to hold large-scale outreach events at no cost for the needy across the U.S. Services include medical consultation, dental care, acupuncture, nutrition consultation, and health education.

326
Medical outreach events

Income inequality has been a serious issue in Los Angeles County. Many working poor are dedicated to their jobs, but their earnings are barely enough for basic living expenses. Unfortunately, medical and dental assistance from the government is very limited to these families.

Since 2011, Tzu Chi has been a major partner of Care Harbor to hold annual medical outreaches at no cost to families who cannot afford medical care in Los Angeles. In 2017, the 3-day outreach event has reached over 2,200 patient visits for primary medical consultation, acupuncture, dental and vision care. Among all services, dental care is the most needed because it is expensive in private clinics. Their financial situation forces them to tolerate a lot of pain. Some patients already have serious dental

problems when they visit volunteer dentists on the outreach days.

Working with dental technician volunteers from local organizations, 45 patients received dentures that were made on site. After the event, 15 more dentures were made by Tzu Chi Clinics for additional patients who attended the outreach event. Having dentures, patients are able to eat solid food again. The improvement of their appearance can also build their confidence in daily lives and at job interviews.

Los Angeles County 2nd District Supervisor Mark Ridley-Thomas said, "Care Harbor fills the gaps in our health care system that are clearly present today. As its volunteers patch over the bare places in our health care safety net, we witness Los Angeles at its best, helping its own."

Bakersfield's long summers give the region a climate suitable for farming so agriculture is a primary industry of this town. Unfortunately, it is common that farm workers receive low pay, work long hours, and are exposed to dangerously hot weather. They barely earn enough money to sustain their families and don't have extra to visit a doctor or a dentist. In response to their needs, Tzu Chi medical volunteers hold a medical outreach once every three months to provide free medical, dental, and acupuncture services at Golden Valley High School in Bakersfield.

Tzu Chi volunteer acupuncturist Shin-Cung Chen, who operated a farm in Argentina, understands the pain of farm workers. Dr. Chen said, "I hope they feel better when they leave. Farm workers usually suffer from muscular pain. Medical care is not convenient for them. They don't earn enough a living and their jobs are time-sensitive. They eventually fall sick from overwork."

An Asian Indian immigrant patient, who lived in this town for over 20 years, suffered from arm pain. His arm could not move, and therefore, he sought for our help. After treatment, he said "I am feeling 100% perfect in my arm and shoulder. I was suffering for around 3 months".

The healing and happiness of our patients is the biggest motivation for us to do community outreach.

International Medical Mission

Tzu Chi completed seven international medical missions in 2017, and helped 5,440 patients, with 158 medical professionals and 1,675 Tzu Chi volunteers. In future years, we plan to have four medical mission trips annually in nearby countries such as Mexico, Honduras, Haiti, and El Salvador.

7
International Medical
Outreach Missions

5,440
Patients Served

Since 1994, Tzu Chi has held international medical outreach events in Latin America and the Caribbean in response to the medical needs of people who are affected by extreme poverty and natural disasters. Primary medical, dental, and acupuncture services are provided to people who cannot afford a single visit to a private doctor. Countries we visited include Mexico, Honduras, Haiti, El Salvador, Dominican Republic, Bolivia, Colombia, Peru, and Sri Lanka. We relieve not only their physical pain but also their emotional suffering.

158
Medical professionals

1,675
Tzu Chi volunteers

In Mexico, many people who live in poverty cannot afford medical care. Their situation got worse after the Central Mexico Earthquake in 2017. Some of them have shoulder or ankle injuries from falling debris. They endured their pain until Tzu Chi's arrival to provide free medical services. Our medical missions are important for them after all the headaches, muscle pain, and emotional distress.

"I have been in a lot of pain since the earthquake. I lost my son and my mother, and I was injured. You helped with my eyesight and hearing. I was hesitant to come but I see now there was no need to worry." – Alma Rosa Calderon, a Zacatepec Resident

"Unfortunately, my condition is chronic but I'm still going home grateful for the attention you provided... You tried to cheer me up and that's why I'm so grateful." – Jose Manuel Lopez, a Xochimilco Resident

Dental care is not easily affordable in Jojutla, Mexico. It forces many people to live in pain. Maria Isabel Lopez, a single mother who strives for the survival of her family, does not have money for her children's basic dental care although they are living with pain. During outreach event, Tzu Chi volunteer dentists precisely diagnosed the cause of their toothache and removed the little pieces of their baby teeth. The pain went away, and they restored their normal daily lives.

"Truthfully, this would've cost me money and now I'm a single mom. I have no resources to take them to a private dentist. Right now, I'm very thankful for everyone who helps us. Thank you, sincerely." – Maria Isabel Lopez

"I couldn't sleep due to the pain. It's great that you guys came. We're thankful because we're no longer living with pain and other problems." – Amayrani Gomez, the daughter of Maria Isabel Lopez

Tzu Chi understands the importance of improving the overall health of communities. Starting as a Cancer Support Group in 2000 and Kidney Dialysis Support Group in 2005, Tzu Chi has engaged patients and their families with classes promoting healthy lifestyles and positive thinking. To create an awareness of preventive health in local communities, the Healthy Community Program offers health education with cancer and common disease prevention lectures, cancer screening, chronic metabolic disease management program, exercise and healthy cooking classes, walking groups, and community outreach.

Tzu Chi Medical Foundation provides Practical Everyday Event for our local community residents which benefits their mind and body.

Dr. Ruiguang Chen teaches local community residents exercises to strengthen and protect their bodies.

Mr. Sun, a Chinese immigrant, has worked diligently in California for 30 years. When he was supposed to enjoy his life after retirement 5 years ago, he was diagnosed with prostate cancer at a late stage. Even though he felt hopeless and upset, he started to attend the Tzu Chi Health Education Lectures and Cancer Support Group. With a better understanding of cancer and after receiving warm encouragements from Tzu Chi volunteers as well as fellow patients, he is building confidence to be recovered. He actively improves his lifestyle by exercising regularly, taking plant-based diets, and thinking positively. He was impressed by Tzu Chi's free prostate cancer screening test for the public because it saves lives by detecting prostate cancer early.

"I truly appreciate what the Tzu Chi Healthy Community Program has done. The benefits are not only for me but also for the community, which is really impressive and helpful." – Mr. Sun
